Project Name	Airlines Data Analytics for Aviation Industry

DASHBOARD:

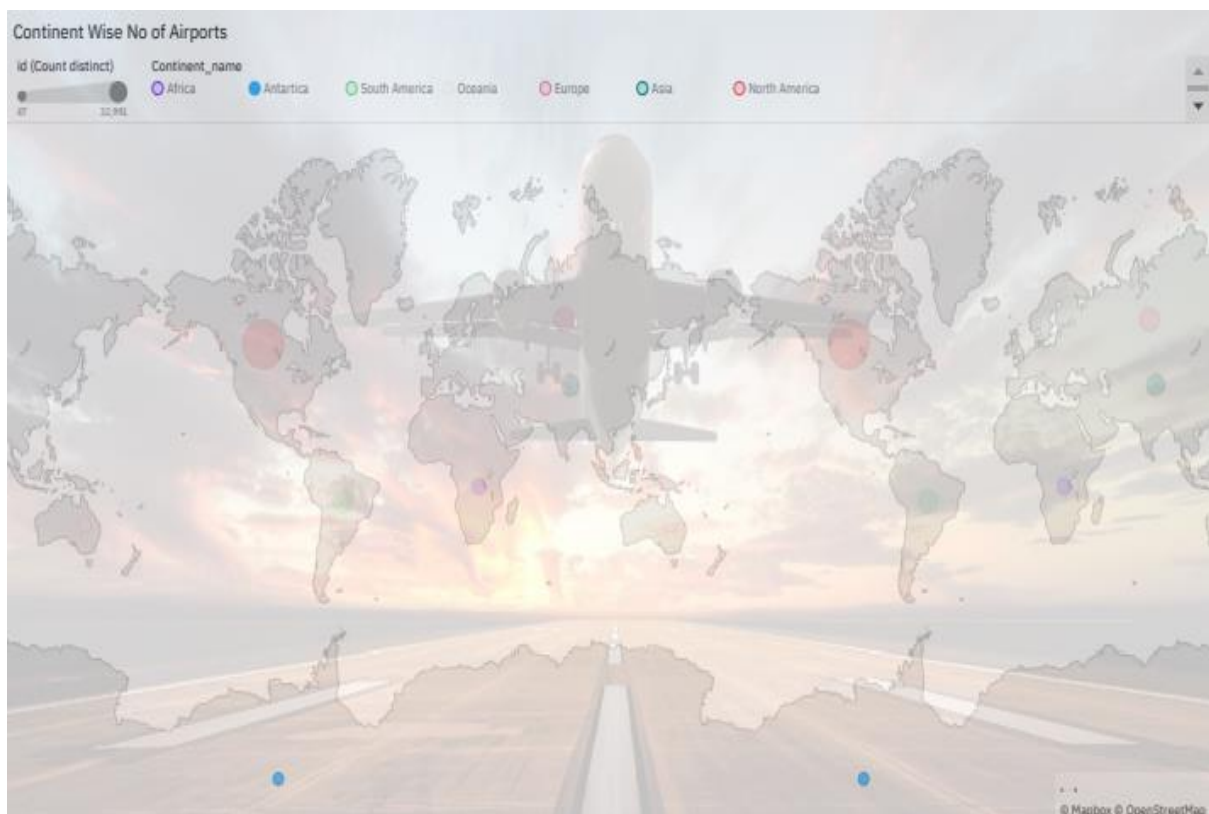

Dashboards are a collection of widgets that give you an overview of the reports and metrics you care about most. Dashboards let you monitor many metrics at once, so you can quickly check the health of your accounts or see correlations between different reports. Dashboards are easy to create, customize and share

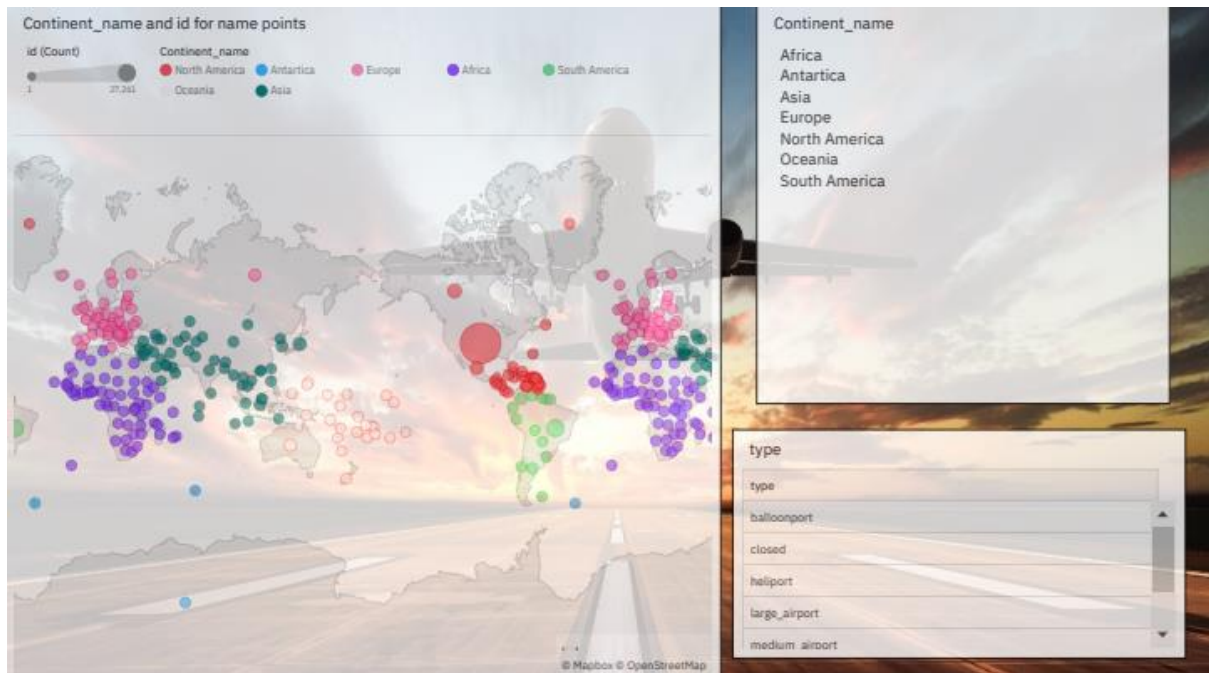

An airports officials can view the top 10 countries by the count of airport in a continent by just clicking the any of the continent names from the continent name list (AFRICA) , also the pie chart and packed bubble chart can also be viewed for the same.
